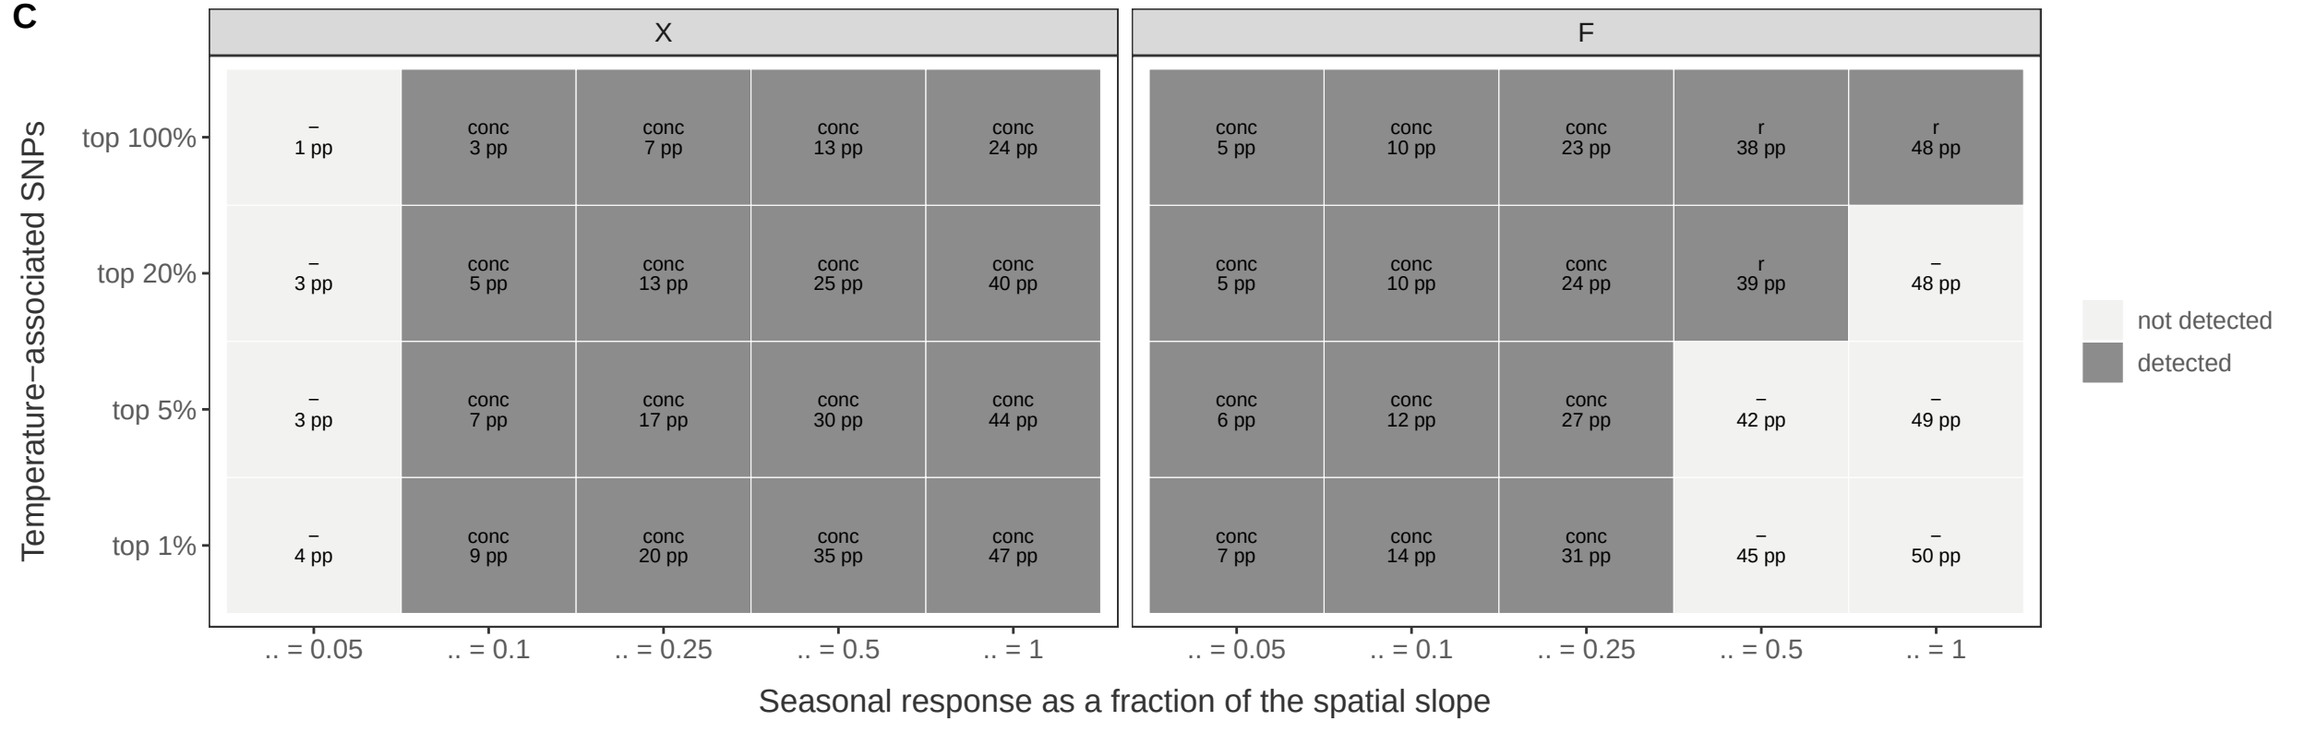
A
X
F
p < 0.01
p < 0.001
SNPs below threshold
time
temperature
Seasonal model
B
Seasonal GLM (SNPs at p < 0.001)
Temporal Fc (excess above observed)
SNPs under selection
2 pp
6 pp
12 pp
18 pp
23 pp
32 pp
38 pp
45 pp
Power
Seasonal change in allele frequency at selected SNPs
(percentage points from 50%, first to last sample)



C
X
F
Temperature−associated SNPs
top 100%
top 20%
top 5%
top 1%
not detected
detected
.. = 0.05
.. = 0.1
.. = 0.25
.. = 0.5
.. = 1
Seasonal response as a fraction of the spatial slope
